

Production Bundle

Processing Suite for Pro Tools™ AAX and Audio Units

Bundle up.

The Metric Halo Production Bundle — \$699

Software requirements: Pro Tools 10/11 (Mac/Win) Mac AU host, iLok account

The Metric Halo Production Bundle for AAX is here – the seven essential plug-ins that will help you take your Pro Tools 10 projects to new heights:

- ChannelStrip 3**
- Character**
- HaloVerb**
- Multiband Dynamics**
- Precision DeEsser**
- TransientControl**
- Multiband Expander**

We wanted to do more than simply port our existing ChannelStrip plug-in to the AAX format. We wanted to release a suite of software that builds on ChannelStrip’s fourteen-year legacy of sonic quality and gives our customers great signal processing options for Pro Tools 10.

Loyal customers can get discounts on the Production Bundle in two ways:

- Channelstrip owners (excluding CS for Garageband) can get a coupon worth \$150 toward an upgrade to the Production Bundle
- +DSP owners can get a coupon worth \$150 toward the purchase of the Production Bundle

If you own both you can combine the coupons for a \$300 discount!

Audio Units

The Production Bundle runs in the AAX plug-in format in Pro Tools 10/11 (Native and AAX DSP modes) as well as in Mac Audio Units with a single license!
